February 2010

These are exciting times for us at Rogers First Assembly. We are embarking on our first remodel project in many years. As you know our facilities are in desperate need of upgrades. We have set aside 2010 as the year of rebuilding.

Our goal is to remodel many aspects of our building. We are believing God to help us raise \$50,000 for this project. There are several things that we are planning to work on:

1. Repair Roof and Ridge Vent

In order to fix the mildew in our sanctuary we must repair our roof and remove the ridge vent. We have sought advice on this matter and have been told that our problem is coming from moisture getting in through the ridge vent. We will remove shingles on both sides of the roof, 4 foot down for the length of the roof. We will remove the decking, pull out any wet or damaged insulation, bleach the mildew and replace the insulation, decking and shingles.

2. Re-carpet sanctuary, nurseries and office hallway. Tile foyer.

We will be replacing the carpet in these rooms with high quality carpeting. We will also lay ceramic tile in the foyer and nursery hallway. The cost of this project is \$20,377.00

3. Re-upholster pews.

We will re-upholster and re-stain the pews. We will hire a pew company to come in and replace the pew foam and fabric on the seat, while adding a pad and fabric to the back of the seat. The cost of this project is \$9,850.00

4. Sheetrock the back platform wall.

We will remove the paneling on the back of the platform and replace it with sheetrock.

5. Repaint the Sanctuary, Foyer and Nurseries.

6. Expand Platform

We will expand the platform to extend to the side walls of the sanctuary. This will enable us to move the piano from the altar area to the platform. We will then be able to bring the other altar to the altar area.

7. Replace Sanctuary Entrance Doors

We will replace the doors leading into the sanctuary with new doors.

8. Replace the furnishings in the foyer.

We will purchase new furniture for the foyer.

9. Install Drum Enclosure

We will enclose our drums and install microphones so that we can control the volume of the drums through the sound system. This project will cost \$2100.

There are several other small projects that we will be doing but this is the bulk of the project. We invite you to pray for the provision for this exciting time. We encourage everyone to seek the Lord for what He would have us to give. If you would like to give to this project, please note on your check: Building Remodel.

We understand personal budgets may be tight but we want to challenge you to ask God to provide you extra finances to be able to give to Project Rebuild. If you have already pledged or given, thank you!

Working Together To Build God's House,

Pastor Danny
